## Adhoc Announcement according to § 15 WpHG

### **OpenLimit Holding AG: OpenLimit Receives Large Contract from Fujitsu Technology Solutions for the Project DiBAS of the German Federal Employment Agency**

Baar, Switzerland – February 8, 2010 – OpenLimit SignCubes AG, a wholly-owned subsidiary of OpenLimit Holding AG (ISIN: CH.002.223.700.9), received a large contract today from Fujitsu Technology Solutions GmbH for the project „DiBAS“ of the German Federal Employment Agency (Bundesagentur für Arbeit). All documents of the Federal Employment Agency including its decentralized service offices will be digitized and then electronically signed with OpenLimit server technologies over the next five years.

DiBAS is one of largest and most ambitious public sector projects in Europe. In order to reduce the amount of paper used by the administration, all documents of the Federal Employment Agency will be digitized, signed and electronically stored in order to make documents available in electronic form in the future. In addition to existing documents, new documents will also be maintained electronically.

The project volume is comprised of a fixed component for the software licenses implemented, services, software maintenance per annum and a variable component per signature to be applied to the estimated one to three billion documents. Based on these parameters, the project volume over the next five years will be in the seven digit EUR range. The parties agreed on confidentiality pertaining to exact contract conditions.

#### **About OpenLimit**

OpenLimit is an internationally leading provider of certified electronic identity and signature solutions. The components of the solution can be easily integrated into existing applications, enable media-consistent workflows and the efficient management of electronic documents in all business areas. OpenLimit holds the very first certification recognizing world-wide compliance with the international security standard, Common Criteria EAL 4+, guaranteeing the highest degree of security and legal validity currently achievable.
