RISING INTEREST IN ELECTRONIC SIGNATURE

OPENLiMiT is due to release Q2 results on 22 August. As table 1 overleaf shows, we are looking for sales of CHF 0.6m and an operating loss of CHF 0.5m (Q2 2007: CHF 0.7m and EBIT of CHF 0.4m respectively). We expect the operating result in Q2/08 to be lower than in Q2/07 due to higher staff numbers and increased depreciation (since 2007). As is usual at OPENLiMiT, sales and profits will be concentrated in the second half of the year, particularly in Q4, when the company is scheduled to finish several large projects.

ePA and ELENA signal rising interest in the electronic signature On 22 July 2008 the German Interior Minister, Wolfgang Schäuble, presented a new concept for a German electronic ID card (elektronischer Personalausweis – ePA). From 2010 the ePA will incorporate a biometric data set and will be able to handle the qualified electronic signature. The qualified electronic signature feature will improve the security of internet business (legally binding validation of identity) and enable governmental agencies to operate on a purely electronic basis (eliminating the need for paper). On 25 June 2008 the German Federal Cabinet presented a draft law governing the electronic administration of social security payments (ELENA - elektronischer Einkommensnachweis). ELENA will use qualified electronic signature technology to guarantee the authenticity of transferred data. The ELENA Project will entail the reorganisation of public services in several phases between 2010 and 2012. The German Government expects the strategic migration to electronic media to generate annual savings of c. €80m. We see both ePA and ELENA as catalysts for the widespread adoption of electronic signature software.

Unchanged full year guidance despite economic uncertainty OPENLiMiT's projects are currently driven primarily by the long term strategic decisions of the German Government, so we see no direct impact of the current economic uncertainty on the business and keep our growth forecasts for 2008 and 2009 unchanged.

Traditionally strong H2 expected Due to the company's dependence on the completion of individual projects, OPENLiMiT's quarterly figures are not always representative of underlying performance. Like most software companies, OPENLiMiT's revenue is weighted towards the fourth quarter. In 2007 OPENLiMiT booked 75% of its revenues in Q4. For 2008 we expect this figure to be 71%. For now we see no reason to change our projections and maintain our €5.00 price target and Strong Buy recommendation.

RISKS

Risks to our price target include but are not limited to: delay in large projects, erosion of the company's present competitive lead, further dilution of shareholders' interests and the failure of electronic signature applications to achieve widespread market acceptance.

FIRST BERLIN POLICY

In an effort to assure the independence of First Berlin research neither analysts nor the company itself trade or own securities in subject companies. In addition, analysts' compensation is not directly linked to specific financial transactions, trading revenue or asset management fees. Analysts are compensated on a broad range of benchmarks. Furthermore, First Berlin receives no compensation from subject companies in relation to the costs of producing this report.

ANALYST CERTIFICATION

We, Wladislaw Guentner & Simon Scholes, certify that the views expressed in this report accurately reflect our personal and professional views about the subject company; and we certify that our compensation is not directly linked to any specific financial transaction including trading revenue or asset management fees; neither is it directly or indirectly related to the specific recommendation or views contained in this research. In addition, we possess no shares in the subject company.

INVESTMENT RATING SYSTEM

First Berlin's investment rating system is five tiered and includes an investment recommendation and a risk rating. Our recommendations, which are a function of our expectation of total return (forecast price appreciation and dividend yield) in the year specified, are as follows:

STRONG BUY: Expected return greater than 50% and a high level of confidence in management's financial guidance

BUY: Expected return greater than 25%

ADD: Expected return between 0% and 25%

REDUCE: Expected negative return between 0% and -15%

SELL: Expected negative return greater than -15%

Our risk ratings are Low, Medium, High and Speculative and are determined by ten factors: corporate governance, quality of earnings, management strength, balance sheet and financing risk, competitive position, standard of financial disclosure, regulatory and political uncertainty, company size, free float and other company specific risks. These risk factors are incorporated into our valuation models and are therefore reflected in our price targets. Our models are available upon request to First Berlin clients.

Up until 16 May 2008, First Berlin's investment rating system was three tiered and was a function of our expectation of return (forecast price appreciation and dividend yield) over the specified year. Our investment ratings were as follows: **BUY:** expected return greater than 15%; **HOLD:** expected return between 0% and 15%; and **SELL:** expected negative return.
