Adhoc Announcement according to §15 WpHG

OpenLimit Holding AG: Fujitsu and OpenLimit sign OEM contract for unique, long-term archiving solution

(Baar, October 20th, 2011) - Fujitsu Technology Solutions GmbH and OpenLimit SignCubes AG, a 100% subsidiary of OpenLimit Holding AG, today signed a pioneering Original Equipment Manufacturing (OEM) agreement concerning the SecDocs product, which was developed in close cooperation to provide a software solution for evidentiary value-preserving, long-term archiving. Beginning in the 4th quarter of 2011, both companies will be offering this joint product via their respective distribution channels under the official name "Fujitsu SecDocs powered by OpenLimit". Intended for sale worldwide, SecDocs can be either deployed by customers as a standalone component in their data centres or subscribed to as a software-as-a-service solution. Initial pilot projects have been implemented successfully already and will soon be starting live operation. SecDocs is currently undergoing Common Criteria certification by the German Federal Office for Security in Information Technology (BSI).

"Fujitsu SecDocs powered by OpenLimit" is a product designed for the confidential archiving of digital documents. It combines the high-availability storage of large volumes of documents with sustained preservation of evidentiary value in a flexible and multifunctional solution. The middleware stores the documents in standardised durable memory systems based on open standards in such a way that they remain readable and can be migrated in the long term. The process used to regularly check the validity of the signatures and over-signatures runs automatically using future-proof algorithms.

Fujitsu SecDocs offers customers advantageous pricing combined with significantly enhanced efficiency compared with physical document archives. The OEM agreement stipulates, among other conditions, how both companies will share the sales revenue resulting from basic licence fees, recurring inventory and transaction charges, as well as software maintenance and support.

In celebration of the new OEM agreement Fujitsu Technology Solutions and OpenLimit will host an official launch event under the motto „Longer than a Human Life - SecDocs 2012“ on October 24th, 2011 in Munich and will present the current status of the SecDocs product platform to selected clients, partners and relevant testing and certification authorities together with a roadmap for 2012.

About OpenLimit

OpenLimit Holding AG is an internationally leading provider of certified software solutions for electronic signatures and identities. Our software components can easily be integrated into existing applications, enabling a highly efficient management of electronic documents, media-consistent workflows and process optimisation in all business sectors. OpenLimit holds the very first certification recognising world-wide compliance with international security standard, Common Criteria EAL 4+, guaranteeing the highest degree of security and legal validity currently achievable.
