SOON BIG IN JAPAN?

On 16 May OpenLimit published Q1 results which were in line with our expectations. A conference call was held at 9 am. Sales increased by 20% y/y to €1.0m. Operating loss of €0.7m was slightly higher y/y. OpenLimit's partner has won two Japanese global players as clients and started pilot projects with them. In Germany the publication of the technical guideline RESISCAN creates legal security for replacing scanning which looks set to support OpenLimit's signature technology. We reiterate our Buy rating and the €1.40 price target.

Q1 results in line Q1 is a seasonally weak quarter and thus not an indicator for the full year results. Sales increased by 20% y/y to €1.0m (FBe: €0.95m). The operating loss increased slightly to €-0.72m (FBe: €0.58m, Q1 2012: €0.63m). The net loss amounted to €0.77m (FBe: €0.63m, Q1 2012: €0.74m).

Liquid funds reduced Liquid funds fell back to €0.7m from €1.9m at the end of 2012. Management does not expect further cash burn in coming quarters.

Guidance for 2013 reiterated OpenLimit reiterated its 2013 guidance (moderate sales growth and reduction of net loss).

Two Japanese global players as new clients In Q1 OpenLimit adapted its signature technology (OpenLimit Middleware Version 3 and OpenLimit SignatureServices) to the Asian market and started pilot projects with two Japanese global players. The latter signalled interest in acting as a reseller for the product. If the pilot projects are successful OpenLimit will have the opportunity to establish itself in the Japanese market.

RESISCAN creates legal security In Germany the publication of the technical guideline RESISCAN creates legal security for replacing scanning. It serves as decision-making aid for public authorities, private businesses and the health... (p.t.o.)

RISKS

Risks include, but are not limited to: delay in large projects, erosion of the company's competitive lead and the failure of electronic signature applications to achieve broad market acceptance.

COMPANY PROFILE

OpenLimit technologies enable people and machines globally to communicate securely, identifiably and provably. Base technologies and products are developed in the following areas: electronic identities, electronic signatures, evidentiary value-preserving long-term storage of data and documents, and secure data transmission between machines.

...care sector with regard to the scanning of paper documents which are subsequently destroyed. Documents requiring a high protection level are to be protected by a qualified electronic signature and a time stamp. The guideline looks set to support OpenLimit's signature technology.

Truedentity making progress In Q1 OpenLimit completed the development of truedentity technology 1.0. The truedentity product family now encompasses authentication clients for both PCs and Android devices such as smart phones and tablets. Furthermore, the truedentity server also facilitates the embedding of the authentication technology in diverse online application scenarios.

Following the completion of truedentity 1.0 OpenLimit increased marketing efforts in the areas eHealth and industry and approached many potential clients at the CEBIT.

Internationalising SecDocs OpenLimit is currently developing the next version of SecDocs which will be adapted for international markets. The new version will be used in ongoing projects.

Buy rating and price target reiterated Based on unchanged estimates an updated DCF model still yields a price target of €1.40. We reiterate our Buy recommendation.

FIRST BERLIN POLICY

In an effort to assure the independence of First Berlin research neither analysts nor the company itself trade or own securities in subject companies. In addition, analysts' compensation is not directly linked to specific financial transactions, trading revenue or asset management fees. Analysts are compensated on a broad range of benchmarks. Furthermore, First Berlin receives no compensation from subject companies in relation to the costs of producing this report.

ANALYST CERTIFICATION

I, Dr. Karsten von Blumenthal, certify that the views expressed in this report accurately reflect my personal and professional views about the subject company; and I certify that my compensation is not directly linked to any specific financial transaction including trading revenue or asset management fees; neither is it directly or indirectly related to the specific recommendation or views contained in this research. In addition, I possess no shares in the subject company.

INVESTMENT RATING SYSTEM

First Berlin's investment rating system is five tiered and includes an investment recommendation and a risk rating. Our recommendations, which are a function of our expectation of total return (forecast price appreciation and dividend yield) in the year specified, are as follows:

STRONG BUY: Expected return greater than 50% and a high level of confidence in management's financial guidance

BUY: Expected return greater than 25%

ADD: Expected return between 0% and 25%

REDUCE: Expected negative return between 0% and -15%

SELL: Expected negative return greater than -15%

Our risk ratings are Low, Medium, High and Speculative and are determined by ten factors: corporate governance, quality of earnings, management strength, balance sheet and financing risk, competitive position, standard of financial disclosure, regulatory and political uncertainty, company size, free float and other company specific risks. These risk factors are incorporated into our valuation models and are therefore reflected in our price targets. Our models are available upon request to First Berlin clients.

Up until 16 May 2008, First Berlin's investment rating system was three tiered and was a function of our expectation of return (forecast price appreciation and dividend yield) over the specified year. Our investment ratings were as follows: **BUY:** expected return greater than 15%; **HOLD:** expected return between 0% and 15%; and **SELL:** expected negative return.
