Press Release

New signature software OpenLimit CC Sign 2.5 available

With new algorithm catalog and improved user interface

(Baar/Berlin, June 3, 2009) With immediate effect companies, authorities and citizens can purchase the approved signature software OpenLimit CC Sign version 2.5. The professional and already certified software for digital signatures stands out due to a number of innovations, an easy handling and highest security requirements.

Trust in certified security

As usual with OpenLimit, users of CC Sign 2.5 don't have to be satisfied with a manufacturer's declaration. The base components of the software are certified according to the highest and internationally recognized security standard Common Criteria EAL 4+ and confirmed by the German Federal Office for Information Security (BSI). Therefore signatures created with OpenLimit CC Sign 2.5 are absolutely secure and legally binding.

Sign and verify more efficient

The version 2.5 provides several new features compared to the previous version. Due to elliptic curves and high-complex 512 bit hash-algorithms, electronic signatures created with CC Sign are more secure than ever before. An automatic update tool guarantees an up-to-date software. The integrated OpenLimit Viewer is even more user-friendly than before. New: The OpenLimit Viewer is provided with a signature card. With it, digital signatures can be displayed and verified at the same time with a single mouse click.

Order your upgrade online

In case you are already applying an older version of OpenLimit CC Sign, you can easily and comfortably order an upgrade via the OpenLimit website. All users of the older CC Sign version 2.1.6.3 can upgrade to version 2.5 for free!

Test the new OpenLimit CC Sign 2.5

OpenLimit invites you to convince yourself of the software innovations. Download the 30-day trial version from OpenLimit CC Sign 2.5 and try out all software functions.
